Isaac Hollow Horn Bear

Software Engineer

SUMMARY

I enjoy the challenge of adapting to the ever-changing technology field and finding unique and simple solutions. Proven track record of creating and implementing successful front and back-end web applications and looking to bring my tech skills to a company.

WORK EXPERIENCE

Full Stack Developer at Interstate Advanced Materials

February 2023 — Present

● Develop, test, and maintain web applications using the LAMP stack

● Collaborate with cross-functional teams, including project managers, designers, and other developers.

● Writing PHP and JavaScript code for advanced UI.

● Completing back-end tasks, such as creating and maintaining a database.

● Providing technical support for software applications as needed.

● Proactively researching and continuously seeking to learn new technologies like Redis and Python for ML.

● Debugging code for existing programs based on immediate need and troubleshooting system bugs and issues.

Software Engineer at 100devs

October 2020 — February 2023

Collaborated with a team of developers to build modern and responsive web applications using best practices
Built semantically structured full-stack web applications
Applied agile methodologies like SCRUM for project management

Full Stack Web Developer at Hollow Horn Bear | Sacramento, CA

January 2019 — Present

Created full-stack web applications and static websites for different clients across small and medium-sized businesses. Also, I consulted on SEO and social media strategy. Some clients included:
Native Dads Network – A non-profit organization geared to helping Native families.

Passion Project:

Native Stories (Fullstack Web App) – Users can create profiles and upload their tribe's stories in a certain area using geotags. They can also edit or delete the stories they upload. Utilizing Node and MongoDB as the backend.
